

DUNCAN ANDERSON

AI Automation Consultant | AI Integration Specialist | Data Scientist | Full-Stack Developer

Montreal, QC | duncan@duncananderson.ca | www.duncananderson.ca/en | linkedin.com/in/duncan-kg-anderson

AI integration specialist, data scientist, and full-stack developer with 5+ years building production AI applications, automation systems, data pipelines, and SaaS products. I take on practical AI consulting projects where a business has messy work spread across tools, documents, inboxes, CRMs, spreadsheets, and APIs, and needs a reliable system with human review where it matters.

RELEVANT QUALIFICATIONS

- Built production AI and data systems across travel, payments/disputes, sports analytics, content operations, and property operations.
- Comfortable taking projects from process mapping through API integration, data modeling, implementation, monitoring, documentation, and handoff.
- Strong fit for workflow automation, CRM/data cleanup, internal tools, AI-assisted review queues, content operations, reporting systems, and API-heavy integrations.
- Python, TypeScript, SQL, REST APIs, Next.js, FastAPI, PostgreSQL, Redis, Supabase, Stripe, RevenueCat, PostHog, Postmark, WordPress REST API, Airtable, and workflow automation experience.
- Bilingual English/French. Based in Eastern time zone.

SELECTED AI AUTOMATION / CONSULTING WORK

Independent AI Automation Consultant | 2026 - Present

- Build practical AI and automation systems for small teams that run on a mix of CRMs, spreadsheets, forms, documents, email, payments, scheduling tools, and manual review steps.
- Typical projects include API integrations, CRM/list updates, data cleanup, document or receipt extraction, inbox triage, internal dashboards, reporting workflows, content publishing systems, and review-first AI tools.
- Emphasis on safe automation: duplicate prevention, protected fields, approval queues, clear logs, failure paths, and documentation so operators know what changed and what still needs a person.
- Recent prototypes include property operations workflows around Airtable, a therapy-practice publishing system for WordPress drafts, design-business operations dashboards, and course-enrollment automation patterns.

Founder & Solo Developer, The Lineup | Oct 2025 - Present

- Designed, built, and operate a production multi-sport analytics SaaS with player projections, live odds ingestion, EV tools, arbitrage discovery, automated settlement, subscriptions, email, analytics, and admin monitoring.
- Built the full stack solo: FastAPI/Python backend, Next.js/TypeScript frontend, PostgreSQL/Supabase, Redis, Stripe, RevenueCat, Postmark, PostHog, Railway, Vercel, and Capacitor iOS.
- Developed LightGBM projection systems with 130+ engineered features and data-quality/freshness checks across high-volume sports data pipelines.

AI Integration Specialist - Solutions Lab, FlightHub | Jul 2025 - Oct 2025

- Led development of AI-powered applications across core business functions, replacing manual processes with production systems.
- Built an AI deal recommendation engine that analyzed flight inventory to score strong-value fares by route, timing, and historical pricing.
- Designed and built an automated chargeback defense pipeline that ingested disputes, gathered booking and transaction evidence, classified root causes, and assembled tailored response packages.

Data Analyst - Loss Prevention, FlightHub | Oct 2021 - Jun 2025

- Collected, cleaned, and processed large operational datasets using SQL, Python, and Excel; applied statistical and ML methods to identify fraud patterns, risk signals, and operational insights.
- Built dashboards and analyses for data-driven decision-making.

Frontend Developer, CHU Sainte-Justine Research Centre | Aug 2019 - Sep 2021

- Built and maintained websites using Webflow and custom code, including login portal, CMS, SEO, and media workflows.

EDUCATION

Diploma, Data Science - BrainStation, Montreal, 2021 | Certificate, Web Development - BrainStation, 2018 | Diploma, Journalism - Langara College, Vancouver, 2016 - 2018
