

DUNCAN ANDERSON

AI WORKFLOW ENGINEER & DEVELOPER

Montreal, QC (Eastern Time) | duncan@duncananderson.ca | duncananderson.ca/en | linkedin.com/in/duncan-kg-anderson | Open to remote contract work

AI workflow engineer, data scientist, and full-stack developer with 5+ years shipping production AI applications, automation systems, data pipelines, and SaaS products. Independently takes ambiguous operating problems from process mapping and prototype through API integration, testing, monitoring, documentation, and handoff. Strongest in Python/TypeScript systems that combine APIs, data, LLM-assisted decisions, and human review.

CORE SKILLS

- Workflow and integration: Python, TypeScript/JavaScript, REST APIs, webhooks, Make.com, n8n-compatible orchestration patterns, Airtable, WordPress REST API, PostgreSQL/Supabase, Redis
- AI and agent development: Codex, Claude Code, prompt design and evaluation, structured extraction, classification, summarization, tool-based agent workflows, MCP-based integrations, human-in-the-loop review
- Applications and delivery: Next.js, FastAPI, SQL, Git/GitHub, CI/CD, Railway, Vercel, PostHog, monitoring, error handling, technical documentation, Agile delivery

RELEVANT EXPERIENCE

Independent AI Automation Consultant | 2026 - Present

- Design and build API/webhook automations and AI-assisted internal tools for small teams, owning discovery, architecture, implementation, QA, documentation, and operator handoff.
- Delivered a property-operations workflow around Airtable that separates fast field capture from permanent records, with staged updates, owner review, and explicit exception paths.
- Delivered a healthcare content workflow that transforms approved Google Docs into structured WordPress/Elementor drafts, with editable SEO and image review and a human approval boundary before publication.
- Design and test Make.com webhook/API workflows with payload mapping, normalized backend events, logs, failure paths, and review steps. My hands-on low-code platform experience is Make.com; the orchestration patterns map directly to n8n.
- Use Codex and Claude Code in disciplined Git workflows for rapid prototyping, implementation, debugging, review, and documentation while retaining human ownership of architecture and release decisions.

Founder & Solo Developer, The Lineup | Oct 2025 - Present

- Designed, built, and operate a production multi-sport analytics product spanning Python/FastAPI services, Next.js/TypeScript interfaces, PostgreSQL/Supabase, Redis, web and iOS delivery, subscriptions, and analytics.
- Built live-odds, projection, market-comparison, and automated-settlement pipelines with freshness checks, monitoring, operational tooling, and public result history.
- Ship independently through Git-based CI/CD to Railway and Vercel, translating product ideas into working releases and explaining model and system limitations through customer-facing product design.

AI Integration Specialist - Solutions Lab, FlightHub | Jul 2025 - Oct 2025

- Led delivery of AI-powered applications across core business functions, turning loosely defined workflow problems into production systems.
- Built an AI deal recommendation engine combining inventory, route, timing, and historical-pricing data to surface strong-value fares.
- Built Dispute Defender, a high-volume workflow that gathered booking and transaction evidence, classified dispute context, and assembled traceable response packages for operator review.

Data Analyst - Loss Prevention, FlightHub | Oct 2021 - Jun 2025

- Used Python, SQL, Excel, statistics, and machine learning to identify fraud patterns, payment risk, and operational issues across large datasets; built dashboards and decision-support analyses.

Frontend Developer, CHU Sainte-Justine Research Centre | Aug 2019 - Sep 2021

- Built and maintained healthcare web experiences using Webflow and custom code, including authenticated portals, CMS, SEO, and media workflows.

EDUCATION & LANGUAGES

Diploma, Data Science - BrainStation, 2021 | Certificate, Web Development - BrainStation, 2018 | Diploma, Journalism - Langara College, 2018 | English and French
