

DUNCAN ANDERSON

MAKE AUTOMATION & API INTEGRATION CONSULTANT

Montreal, QC (Eastern Time) | duncan@duncananderson.ca | duncananderson.ca/en | linkedin.com/in/duncan-kg-anderson | Available for remote contract delivery

AI automation consultant, data scientist, and full-stack developer with 5+ years shipping production applications, API integrations, data pipelines, and review-first AI systems. Independently takes business workflows from discovery and architecture through implementation, testing, monitoring, documentation, training, and handoff. Strongest where confidential information must move reliably across APIs without losing records or removing human oversight.

RELEVANT CAPABILITIES

- Make and API integration: Make.com, Python, TypeScript/JavaScript, REST APIs, webhooks, JSON mapping, OAuth/API-key authentication patterns, custom API logic, PostgreSQL/Supabase, Airtable
- AI-assisted communications and documents: OpenAI/LLM workflow patterns, transcription and summarization logic, structured extraction, classification, Google Workspace, WordPress REST API, human approval queues
- Security, reliability, and delivery: protected fields, environment-based credential handling, duplicate prevention, deterministic matching, exception queues, retries, logging, monitoring, error recovery, architecture diagrams, runbooks, maintenance documentation, operator training

RELEVANT EXPERIENCE

Independent AI Automation Consultant | 2026 - Present

- Design and build Make.com, API, and webhook automations for small teams, owning process discovery, data mapping, architecture, implementation, QA, documentation, and operator handoff.
- Build workflows around explicit sources of truth, deterministic record matching, staged updates, and exception queues so uncertain data is reviewed rather than discarded or silently written to the wrong record.
- Delivered a property-operations system around Airtable that separates fast field capture from permanent records, with review gates, protected fields, contractor handoffs, and traceable operational updates.
- Delivered a healthcare content workflow that converts approved Google Docs into structured WordPress/Elementor drafts, with editable metadata, image review, and a human approval boundary before publication.
- Design and test Make.com webhook/API scenarios with payload mapping, normalized backend events, authentication/configuration requirements, operational logs, failure paths, and maintenance runbooks.

Founder & Solo Developer, The Lineup | Oct 2025 - Present

- Designed, built, and operate a production multi-sport analytics product spanning Python/FastAPI services, Next.js/TypeScript interfaces, PostgreSQL/Supabase, Redis, subscriptions, email, analytics, and web/iOS delivery.
- Built reliable event and data pipelines with validation, freshness checks, duplicate protection, automated settlement, monitoring, and public result history.
- Own production operations end to end: credential/configuration management, Git-based CI/CD, Railway and Vercel deployments, incident diagnosis, documentation, and customer-facing support.

AI Integration Specialist - Solutions Lab, FlightHub | Jul 2025 - Oct 2025

- Led delivery of AI-powered applications across core business functions, translating loosely defined operational problems into production systems and explaining technical limits to business stakeholders.
- Built Dispute Defender, a high-volume financial workflow that gathered booking, customer, and transaction evidence; classified dispute context; and assembled traceable response packages for operator review.
- Built an AI deal recommendation system combining inventory, route, timing, and historical-pricing data into ranked, reviewable recommendations.

Data Analyst - Loss Prevention, FlightHub | Oct 2021 - Jun 2025

- Used Python, SQL, Excel, statistics, and machine learning to analyze payment risk, fraud patterns, and operational issues across large confidential datasets; built dashboards and decision-support analyses.

Frontend Developer, CHU Sainte-Justine Research Centre | Aug 2019 - Sep 2021

- Built and maintained healthcare web experiences using Webflow and custom code, including authenticated portals, CMS, SEO, and media workflows.

EDUCATION & LANGUAGES

Diploma, Data Science - BrainStation, 2021 | Certificate, Web Development - BrainStation, 2018 | Diploma, Journalism - Langara College, 2018 | English and French
